

First In IP Video Surveillance

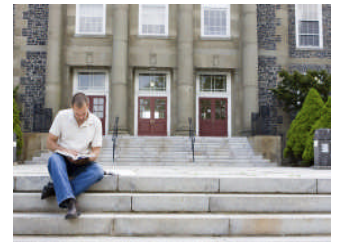

Engineered for the Real World
Centralized Command and Control
Designed to Protect Your People and Assets

DynaView Video Management Systems

APPLICATIONS

Banks/ATMs
Franchise Operations
Retail Outlets
City & Municipal Gov'ts
Military Facilities
Corporate Offices
Schools (K-12)
Seaports
Airports
Transport Centers
Warehouses
Correctional Facilities
High-Volume Retail
Secure Facilities
Data Centers
Power Plants
Universities
Water Supply Utilities
Waste Management

DynaView Video Management Systems provide simple, effective and affordable solutions for the most demanding surveillance installations.

DynaView systems are already helping those responsible for the safety of others to protect people and assets.

DynaView systems . . .

- Reduce vandalism
- Enhance personnel safety
- Protect against theft or burglary
- Monitor and control behavior
- Limit liability claims
- Monitor building occupancy/activity

With a DynaView surveillance system . . .

- A single security guard can monitor multiple locations or buildings simultaneously.
- Security personnel can open audio communications with individuals in hallways, parking garages, and remote buildings.
- Authorized administrative staff can visually monitor activities from their desks.
- In the event of a security threat, local law enforcement can be enabled to look in on specific cameras or physical areas.
- Applications and hardware can be easily added or updated.
- A new security system can be implemented in phases to work within budget constraints.
- Re-use of legacy surveillance system equipment and analog cameras protects existing investments.

**Engineered for Your Environment
Designed to Protect Your People and Assets**

KEY FEATURES

- Advanced smart recording technology saves disk space
- Export snapshot video clips with user-selected codecs
- Email alarm event notification with image attachment
- Software affinity settings for balanced processing using multiple CPU's
- Simple integration with third party applications such as access control, IP call centers, and in-camera analytics.
- Open architecture platform and extensive API prevents obsolescence
- Modular, scalable, fault tolerant software design
- Custom designed-for-application hardware ensures continuous 24x7x365 operation
- The highest performance CPUs available, well beyond that of "big brand" servers
- Performance-proven hard drives designed to withstand the rigors of continuous digital video storage
- Flexible and fault tolerant multiple RAID1 storage arrays
- Redundant power supplies and case cooling fans on EDGE (optional) and Enterprise models
- 3-year warranty on hardware
- 1-year full application support
- Flexible support and maintenance programs available
- 100% US based technical support

Available DynaView models include . . .

NVR for up to 32 cameras

EDGE for up to 60 cameras

Enterprise up to 150 cameras per server, unlimited total cameras
